EPA Reg. No.: 3282-3
EPA Est. No.: 475-MS-1

NET CONTENTS: 8.0 OZ. (226.7 g)

NOTE: Bracketed information is denoted as: <<directive>>, {insert as noted}, (optional text), [required qualifier] The term "this product" used throughout this document may be replaced with the marketed product brand name.

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets, or other non-target animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS: For control of Norway rats, roof rats, and house mice in and around homes, industrial buildings, and similar man-made structures. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or signs of rodents have been seen. Protect bait from rain or snow. Remove as much alternative food as possible.

MIXING DIRECTIONS: In a disposable container such as a double-ply utility bag, thoroughly mix one part of concentrate (determined by weight) with 11 parts of suitable bait materials. Amounts of all materials to be used in making baits must be determined by weight, not by volume. For example:

1. Place 13 parts of rolled oat groats into the bag. Add 1 part of corn oil to the bag and shake mixture vigorously for 3 minutes.
2. Add 5 parts of whole yellow cornmeal and 1 part of sugar (10X confectioners) and shake the bag vigorously for another 3 minutes. Determine the total weight of bait materials in the bag.
3. Add d-Con Concentrate to bait materials in bag at ratio of 1 part of concentrate per 11 parts of bait materials. Shake the bag vigorously for 3-5 additional minutes.

Adjust the amounts of ingredients use, without altering their relative proportions, to obtain the quantity of bait needed. To make six pounds of bait, use 57 oz. of rolled oat groats, 22 oz. of whole yellow cornmeal, 4.5 oz of 10X confectioners sugar, 4.5 oz. of corn oil, and 8 oz. of d-Con Concentrate.

Bait Materials resembling human foods must be altered in form by crushing, balling, or pelletizing so that they are not readily recognizable as foods.

APPLICATION DIRECTIONS:

- RATS:** Apply 4 to 16 oz. of bait per placement. Maintain an uninterrupted supply of fresh bait for at least 10 days.
- MICE:** Apply ¼ to ½ oz. (1-2 level tablespoons) of bait at 8-12-foot intervals. Larger placements (up to 2 oz.) may be needed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days.
- FOLLOW-UP:** Replace contaminated or spoiled bait immediately. Check perishable baits daily. Collect and dispose of all dead animals and leftover bait properly. To prevent reinfestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestations does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Keep away from human, domestic animals, and pets. Exposure during pregnancy should be avoided. Warfarin may cause harm to the fetus, including possible birth defects. If swallowed, this materials may reduce the clotting ability of the blood an cause bleeding. When mixing baits, wear dust respirators and rubber gloves. If product contacts skin, wash with soap and water.

FIRST AID	
Have label with you when obtaining treatment advice. You may also contact 1-800-228-4722 for emergency medical treatment information.	
If swallowed	<ul style="list-style-type: none"> • Call a Poison Control Center, doctor immediately for treatment advice. • Have a person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by the poison control center or doctor.
If on skin or clothing	<ul style="list-style-type: none"> • Take off contaminated clothing • Rinse skin immediately with plenty of water for 15-20 minutes, • Call a Poison Control center or doctor immediately for treatment advice.
If inhaled	<ul style="list-style-type: none"> • Move person to fresh air. • If person is not breathing, call an ambulance, then give artificial respiration, preferably mouth to mouth, if possible. • Call a Poison Control center or doctor immediately for treatment advice.
If in eyes	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15 minutes. Remove contact lenses, if present, after the first five minutes, then continue rinsing eye. • Call a Poison Control center or doctor immediately for treatment advice.
Note to Physician: If ingested, administer Vitamin K ₁ intramuscularly or orally, as indicated in bishydroxycoumarin overdoses. Repeat as necessary based on monitoring of prothrombin times.	

4 8 4

ENVIRONMENTAL HAZARDS: This product is toxic to mammals and birds. Do not apply this product to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning of equipment or disposing of wastes.

STORAGE AND DISPOSAL:

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Store in a cool dry area inaccessible to children, pets and domestic animals. Store in a locked area in original container separate from other products to prevent cross-contamination of other pesticides, fertilizer, food and feed. If container is damaged or if product has spilled, adequately ventilate the area. Shovel and/or sweep up into a suitable container. Dissolve remaining spilled material with an appropriate solvent and collect in a suitable container.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous waste representative at the nearest EPA Regional office for guidance.

CONTAINER DISPOSAL: Completely empty liner by shaking and tapping sides and bottom to loosen clinging particles. Dispose of liner in a sanitary landfill or by incineration if allowed by State and local authorities. If drum cannot be reused, dispose of in the same manner.

NOTICE TO BUYER AND USER: Buyer and User assume all responsibility for safety and risk associated with any use not in accordance with directions. SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER'S SOLE LIABILITY AND BUYER'S AND USER'S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets, or other non-target animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooved livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS: For control of Norway rats, roof rats, and house mice in and around homes, industrial buildings, and similar man-made structures. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

APPLICATION DIRECTIONS:

SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Remove as much alternative food as possible.

- To Control Rats:** Apply 1-4 bait trays per placement. Maintain an uninterrupted supply of fresh bait for at least 10 days.
- To Control Mice:** Open tray and apply ¼ to ½ oz. (1-2 level tablespoons) of bait at 8 to 12-foot intervals. Larger placements (up to 2 oz.) may be needed at points of extremely high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days.
- Follow-up:** Check bait location every two days for signs of feeding. Replenish bait if more than ½ of the original amount has been removed by rodents. Replace contaminated or spoiled bait immediately. Collect and dispose of all dead animals and leftover bait properly. To prevent reinfestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Keep away from humans, domestic animals, and pets. If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. Wear gloves if bait is handled.

FIRST AID	
Have label with you when obtaining treatment advice. You may also contact 1-800-228-4722 for emergency medical treatment information.	
If swallowed	<ul style="list-style-type: none">• Call a Poison Control Center, doctor, or 1-800-228-4722 immediately for treatment advice.• Have person sip a glass of water if able to swallow.• Do not induce vomiting unless told to do so by the poison control center or doctor.
If on skin	<ul style="list-style-type: none">• Wash with plenty of soap and water.
Note to Physician or Veterinarian: If ingested, administer Vitamin K ₁ intramuscularly or orally, as indicated in bishydroxycoumarin overdoses. Repeat as necessary based on monitoring of prothrombin times.	

ENVIRONMENTAL HAZARDS: This product is toxic to mammals and birds. Do not apply directly to water.

STORAGE AND DISPOSAL

STORAGE: Store only in original container, in a dry place inaccessible to children and pets.

DISPOSAL: **If empty:** Do not reuse empty container. Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

NOTICE TO BUYER AND USER: Buyer and User assume all responsibility for safety and risk associated with any use not in accordance with directions. SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER'S SOLE LIABILITY AND BUYER'S AND USER'S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

OFFICE OF
PREVENTION, PESTICIDES AND
TOXIC SUBSTANCES

Liane Jenkins
Senior Registration Specialist
Reckitt Benckiser Inc.
399 Interpace Parkway
Parsippany, NJ 07054-0225

OCT 31 2008

Subject: Label Notification(s) for Pesticide Registration Notice 2007-4 and 98-10

Change inert ingredients to other ingredients
Added phone number for consumer questions

Dear Ms. Jenkins:

The Agency is in receipt of your Application(s) for Pesticide Notification(s) under Pesticide Registration Notice (PRN) 2007-4 and 98-10 dated September 25, 2008 for:

EPA Registration 3282-65

d-CON Mouse Prufe II

The Registration Division (RD) has conducted a review of this request for applicability under PRN 2007-4 and 98-10 and finds that the label change(s) requested falls within the scope of PRN-2007-4 and 98-10. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact me directly at 703-305-6249 or Nicole Williams of my staff at 703-308-8893.

Sincerely,

Linda Arrington

- EPA Reg. No.: 3282-65
- OPP ID No.: 303688
- Label Change to meet PR Notice 97-6 and 2007-4

Dear Ms. Arrington,

Reckitt Benckiser is notifying the Agency of a few label changes made to the above mentioned registration. These changes should be allowed via Notification. All changes to the proposed Master label are indicted in red text. Below is a summary of these changes:

- Revising the Disposal Instruction as per PR Notice 2007-1. The revised language is taken directly from this PR Notice.
- Changing "Inert" Ingredients to "Other" ingredients as allowed by PR Notice 97-6
- Adding a phone number for consumers to call for questions.

The enclosed documents support this registration action:

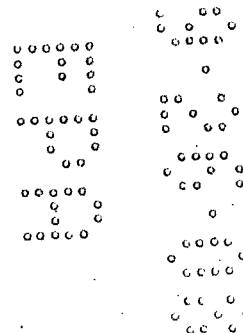

- EPA Application of Pesticide Registration, Form 8570-1, OPP ID No. 303688
- Certification Statement as per PR Notice 95-2
- One copy of proposed label with changes highlighted in red text

Thank you for your assistance with this registration action. If you have any questions, please contact me at (973) 404-2781 or via e-mail at liane.jenkins@reckittbenckiser.com.

Sincerely,

Liane Jenkins

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

USE RESTRICTIONS:

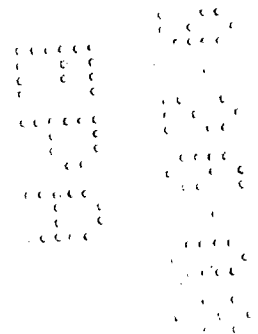

THIS IS NOT A TAMPER-PROOF OR TAMPER RESISTANT BAIT STATION. DO NOT USE THIS PRODUCT IN AREAS ACCESSIBLE TO CHILDREN, PETS, DOMESTIC ANIMALS, OR NONTARGET WILDLIFE. DO NOT USE THIS PRODUCT OUTDOORS.

This product may be used to control house mice in homes, industrial, commercial, agricultural and public buildings. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

SELECTION OF TREATMENT AREAS: Wedges of Mouse Prufe II may be placed indoors along walls, in corners and in concealed places where mice are active and where children, nontarget mammals and birds will not be exposed to the bait.

APPLICATION DIRECTIONS:

Place wedge in horizontal position. Pull tab, lift and twist off. Space wedges at intervals of 8 to 12 feet if mouse activity is not highly localized and placements can be made in areas not accessible to children and nontarget animals. Replace wedges as their contents are consumed. Wedges not touched after 3 days should be moved to new locations appropriate for bait placements (see **USE RESTRICTIONS:**) if mouse activity persists. Maintain a supply of fresh bait for at least 15 days. Collect and dispose of all dead animals and leftover bait properly.

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: May be harmful or fatal if swallowed. This material may reduce the clotting ability of the blood and cause bleeding. Wash hands after handling bait.

FIRST AID	
Have label with you when obtaining treatment advice.	
If swallowed by human	<ul style="list-style-type: none">• Call a Poison Control Center, doctor, or 1-800-228-4722 immediately for treatment advice.• Do not induce vomiting unless told to do so by the poison control center or doctor.
If swallowed by pet or animal	<ul style="list-style-type: none">• Call a veterinarian immediately for treatment advice.
NOTE TO PHYSICIAN AND VETERINARIAN	
<p>This product may reduce the clotting ability of the blood and cause hemorrhaging. The anticoagulant action of this product may produce prolonged prothrombin times for 20 to 30 days after exposure. If poisoning occurs, intramuscular and oral administration of Vitamin K₁ are indicated, as in poisoning from overdose of dicumarol (bishydroxy coumarin). FOR HUMAN CASES: Vitamin K₁ is antidotal at doses of 10 to 20 mg (<u>not</u> mg/kg). Repeated treatments may need to be given for up to 30 days (based on monitoring of prothrombin times). In severe cases, blood transfusions may be necessary. FOR ANIMAL CASES: Vitamin K₁ is antidotal at 5 mg/kg intramuscularly. Oral Vitamin K₁ should be given for up to 30 days at 5 mg/kg (based on monitoring of prothrombin times). In severe cases blood transfusions may be necessary.</p>	

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and wildlife. This product can pose a secondary hazard to birds of prey and mammals. Do not apply directly to water.

STORAGE AND DISPOSAL

STORAGE: Store only in original container, in a dry place inaccessible to children and pets.

DISPOSAL: If empty: Non-refillable container. Do not reuse or refill container. Place in trash or offer for recycling if available.

If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

Important: For Direction for use and first aid instruction in Spanish, please call 1-866-648-8819

WASHINGTON, D.C. 20460

OFFICE OF
PREVENTION, PESTICIDES AND
TOXIC SUBSTANCES

Liane Jenkins
Senior Registration Specialist
Reckitt Benckiser Inc.
399 Interpace Parkway
Parsippany, NJ 07054-0225

OCT 31 2008

Subject: Label Notification(s) for Pesticide Registration Notice 2007-4 and 98-10

Change inert ingredients to other ingredients
Added phone number for consumer questions

Dear Ms. Jenkins:

The Agency is in receipt of your Application(s) for Pesticide Notification(s) under Pesticide Registration Notice (PRN) 2007-4 and 98-10 dated September 25, 2008 for:

EPA Registration 3282-66

d-CON Bait Pellets

The Registration Division (RD) has conducted a review of this request for applicability under PRN 2007-4 and 98-10 and finds that the label change(s) requested falls within the scope of PRN-2007-4 and 98-10. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

Attention: Linda Arrington

Ref.: **d-CON® Bait Pellets**

- EPA Reg. No.: 3282-66
- OPP ID No.: 303689
- Label Change to meet PR Notice 97-6 and 2007-4

Dear Ms. Arrington,

Reckitt Benckiser is notifying the Agency of a few label changes made to the above mentioned registration. These changes should be allowed via Notification. All changes to the proposed Master label are indicted in red text. Below is a summary of these changes:

- Revising the Disposal Instruction as per PR Notice 2007-1. The revised language is taken directly from this PR Notice.
- Changing "Inert" Ingredients to "Other" ingredients as allowed by PR Notice 97-6
- Adding a phone number for consumers to call for questions.

The enclosed documents support this registration action:

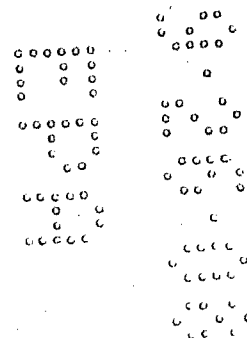

- EPA Application of Pesticide Registration, Form 8570-1, OPP ID No. 303689
- Certification Statement as per PR Notice 95-2
- One copy of proposed label with changes highlighted in red text

Thank you for your assistance with this registration action. If you have any questions, please contact me at (973) 404-2781 or via e-mail at liane.jenkins@reckittbenckiser.com.

Sincerely,

Liane Jenkins

BACK PANEL

d-CON® BAIT PELLETS

KILLS RATS AND MICE

Kills Warfarin-Resistant Norway Rats and Warfarin-Resistant House Mice.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets, or other non target animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by children under six years of age and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooved livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS: This product may be used to control Norway Rats, Roof Rats and House Mice in and around homes, industrial, commercial, agricultural and public buildings. d-CON Pellets Generation II may also be used in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. Do not use in sewers. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or signs of rodents have been seen. Remove as much alternative food as possible. Use tamper-resistant bait stations wherever necessary (see "IMPORTANT:").

APPLICATION DIRECTIONS: The amount of bait contained in the trays in this box is unlikely to be sufficient to kill more than 3 to 12 rats. More than one box may be needed to control larger infestations.

To Control Norway and Roof Rats: Place 1 - 4 bait trays per placement. Space placements at intervals of 15 - 30 feet in infested areas. If trays are not fed for 5 consecutive days, relocate them to other places where rodent activity exists and where placements consistent with the requirements of this label can be made. Maintain an uninterrupted supply of fresh bait for at least 10 days.

To Control House Mice: Open tray and apply 1/4 - 1/2 oz. (1 - 2 level tablespoons) of bait at 8 to 12 foot intervals in infested areas. Larger placements (up to 2 ounces) may be needed at points of extremely high mouse activity. Maintain a supply of fresh bait for at least 15 days.

Check bait locations every 2 days for signs of feeding. Replenish bait if more than 1/2 of the original amount has been removed by rodents. Replace contaminated or spoiled bait immediately if rodent activity is still evident. Collect and dispose of all dead animals and leftover bait properly.

To prevent reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: May be harmful or fatal if swallowed. Keep away from humans, domestic animals, and pets. Wash hands after handling bait IF BAIT IS EATEN BY HUMANS, CALL A PHYSICIAN AT ONCE. For 24 hour emergency assistance, call your local Poison Control Center. IF BAIT IS EATEN BY ANIMALS OR PETS: Call your local veterinarian.

NOTE TO PHYSICIAN AND VETERINARIAN: This product may reduce the clotting ability of the blood and cause hemorrhaging. The anticoagulant action of this product may produce prolonged prothrombin times for 20 to 30 days after exposure. If poisoning occurs, intramuscular and oral administration of Vitamin K₁ are indicated, as in poisoning from overdose of dicumarol (bishydroxy coumarin). FOR HUMAN CASES: Vitamin K₁ is antidotal at doses of 10 to 20 mg (not mg/kg). Repeated treatments may need to be given for up to 30 days (based on monitoring of prothrombin times). In severe cases, blood transfusions may be necessary. FOR ANIMAL CASES: Vitamin K₁ is antidotal at 5 mg/kg intramuscularly. Oral Vitamin K₁ should be given for up to 30 days at 5 mg/kg (based on monitoring of prothrombin times). In severe cases blood transfusions may be necessary.

ENVIRONMENTAL HAZARDS:

This product is toxic to fish, birds and wildlife. This product can pose a secondary hazard to birds of prey and mammals. Do not apply directly to water.

8
11

STORAGE AND DISPOSAL

STORAGE: Store only in original container, in a dry place inaccessible to children and pets.

DISPOSAL: If empty: Non-refillable container. Do not reuse or refill container. Place in trash or offer for recycling if available.

If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

d-Con Bait Pellets II
EPA Reg. No. 3282-74

Dear Ms. Bjornson:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 dated March 27, 2012 for the product d-Con Bait Pellets II. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action(s) requested fall within the scope of PRN 98-10. The label submitted with the application has been stamped "Notification" and will be placed in our records.

If you have any questions, please call me directly at 703-305-5967 or via email at gaines.jennifer@epa.gov.

Sincerely,

A handwritten signature in cursive script that reads "Jennifer Gaines".

Re: d-CON – Bait Pellets II
EPA Registration No. 3282-74
Notification per PR Notice 98-10 to update container size

Dear John:

Technology Sciences Group, Inc., on behalf Reckitt, is submitting the enclosed notification to add an additional container size (64-1 OZ. packs – equivalent to 4 lbs.) to the aforementioned product. You will find the following included to support this amendment:

- 1) Amendment application form,
- 2) One redline version of the revised label, and
- 3) One clean copy of the revised label.

Please do not hesitate to contact me with any questions at (202) 828-8945 or via e-mail:
hbjornson@tsgusa.com.

Sincerely,

Heather R. Bjornson
Senior Regulatory Consultant

1.0 oz – Bait Pack (for Mice)

(GOOD HOUSEKEEPING SEAL)

House Mice (will) eat through (the)(place)(bait) pack

NOTIFICATION

APR 25 2012

**d-CON®
Bait Pellets II**

KILLS MICE

CAN KILL IN ONE FEEDING*

* House Mice may consume a lethal dose in one feeding with first dead mice appearing 4 or 5 days after feeding begins.

Keep out of reach of children.

CAUTION: May be harmful or fatal if swallowed.

Read additional precautionary statements on back panel.

ACTIVE INGREDIENT:

Brodifacoum 3-[3-(4'-bromo-{1,1'-biphenyl}-4-yl)-
1,2,3,4-tetrahydro-1-naphthalenyl]-4-hydroxy-2H-1-
benzopyran-2-one.....0.005%

OTHER INGREDIENTS:99.995%

TOTAL 100.000%

NET WEIGHT: 1.0 OZ. (28 g)

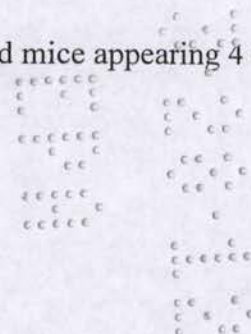

SATISFACTION GUARANTEED OR YOUR MONEY BACK

Call 1-800-228-4722

Important: For directions for use and first aid instruction in Spanish, please call 1-866-648-1819

Ready-to-use

(1) (4) (5) (6) (ready-to-use) place packs

1.0 oz – Bait Pack (for Mice)

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions. Use only for the sites, pests, and application methods described on this label.

IMPORTANT: Do not expose children, pets, or other nontarget animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by children under six years of age and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS: This product may only be used to control House Mice in and around homes, industrial, commercial, agricultural and public buildings. d-CON Bait Pellets II may also be used in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. Do not use in sewers. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

SELECTION OF TREATMENT AREAS: Determine areas where house mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where their signs have been seen. Remove as much alternative food as possible. Use tamper-resistant bait stations wherever necessary (see **"IMPORTANT:"**).

6/21

1.0 oz – Bait Pack (for Mice)

APPLICATION DIRECTIONS:

To Control House Mice: Use one bait pack per placement. Space placements at intervals of 8 to 12 feet in infested areas. Up to 2 bait packs may be used at points of very high house mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days.

Check bait locations every 2 days for signs of feeding. Replenish bait if more than 1/2 of the original amount has been removed by mice. If bait packs are not opened by house mice for 5 consecutive days, they may be relocated to other places where house mice activity exists and where bait placements consistent with the requirements of this label can be made.

While wearing gloves, collect and dispose of all dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, establish permanent bait stations and replenish as needed.

7/21

1.0 oz – Bait Pack (for Mice)

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: May be harmful or fatal if swallowed. This material may reduce the clotting ability of the blood and cause bleeding. Keep away from humans, domestic animals, and pets. Wash hands after handling bait.

FIRST AID	
Have label with you when obtaining treatment advice.	
If swallowed by human	<ul style="list-style-type: none">• Call a Poison Control Center, doctor, or 1-800-228-4722 immediately for treatment advice.• Do not induce vomiting unless told to do so by the poison control center or doctor.
If swallowed by pet or animal	<ul style="list-style-type: none">• Call a veterinarian immediately for treatment advice.
NOTE TO PHYSICIAN AND VETERINARIAN	
<p>This product may reduce the clotting ability of the blood and cause hemorrhaging. The anticoagulant action of this product may produce prolonged prothrombin times for 20 to 30 days after exposure. If poisoning occurs, intramuscular and oral administration of Vitamin K₁ are indicated, as in poisoning from overdose of dicumarol (bishydroxy coumarin). FOR HUMAN CASES: Vitamin K₁ is antidotal at doses of 10 to 20 mg (<u>not</u> mg/kg). Repeated treatments may need to be given for up to 30 days (based on monitoring of prothrombin times). In severe cases, blood transfusions may be necessary. FOR ANIMAL CASES: Vitamin K₁ is antidotal at 5 mg/kg intramuscularly. Oral Vitamin K₁ should be given for up to 30 days at 5 mg/kg (based on monitoring of prothrombin times). In severe cases blood transfusions may be necessary.</p>	

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and wildlife. This product can pose a secondary hazard to birds of prey and mammals. Do not apply directly to water.

8/21

1.0 oz – Bait Pack (for Mice)

STORAGE AND DISPOSAL

Do not contaminate water, food, feed by storage or disposal.

PESTICIDE STORAGE: Store only in original container, in a dry place inaccessible to children and pets.

PESTICIDE DISPOSAL AND CONTAINER HANDLING: Non-refillable container. Do not reuse or refill container. **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

NOTICE TO BUYER AND USER: To the extent consistent with applicable law, Buyer and User assume all responsibility for safety and risk associated with any use not in accordance with directions. SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER'S SOLE LIABILITY AND BUYER'S AND USER'S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.

For Rats and Mice: Check bait locations every 2 days for signs of feeding. Replenish bait if more than 1/2 of the original amount has been removed by rodents. If bait packs are not opened by rodents for 5 consecutive days, they may be relocated to other places where their activity exists and where bait placements consistent with the requirements of this label can be made.

While wearing gloves, collect and dispose of all dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, establish permanent bait stations and replenish as needed.

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: May be harmful or fatal if swallowed. This material may reduce the clotting ability of the blood and cause bleeding. Keep away from humans, domestic animals, and pets. Wash hands after handling bait.

FIRST AID

Have label with you when obtaining treatment advice.

If swallowed by human

- Call a Poison Control Center, doctor, or 1-800-228-4722 immediately for treatment advice.
- Do not induce vomiting unless told to do so by the poison control center or doctor.

If swallowed by pet or animal

- Call a veterinarian immediately for treatment advice.

NOTE TO PHYSICIAN AND VETERINARIAN

This product may reduce the clotting ability of the blood and cause hemorrhaging. The anticoagulant action of this product may produce prolonged prothrombin times for 20 to 30 days after exposure. If poisoning occurs, intramuscular and oral administration of Vitamin K₁ are indicated, as in poisoning from overdose of dicumarol (bishydroxy coumarin). **FOR HUMAN CASES:** Vitamin K₁ is antidotal at doses of 10 to 20 mg (not mg/kg). Repeated treatments may need to be given for up to 30 days (based on monitoring of prothrombin times). In severe cases, blood transfusions may be necessary. **FOR ANIMAL CASES:** Vitamin K₁ is antidotal at 5 mg/kg intramuscularly. Oral Vitamin K₁ should be given for up to 30 days at 5 mg/kg (based on monitoring of prothrombin times). In severe cases blood transfusions may be necessary.

21/21

20, 64/1.0 oz Bait Pack Outer Box

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and wildlife. This product can pose a secondary hazard to birds of prey and mammals. Do not apply directly to water.

STORAGE AND DISPOSAL

Do not contaminate water, food, feed by storage or disposal.

PESTICIDE STORAGE: Store only in original container, in a dry place inaccessible to children and pets.

PESTICIDE DISPOSAL AND CONTAINER HANDLING: Non-refillable container. Do not reuse or refill container. **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

NOTICE TO BUYER AND USER: To the extent consistent with applicable law, Buyer and User assume all responsibility for safety and risk associated with any use not in accordance with directions. SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER'S SOLE LIABILITY AND BUYER'S AND USER'S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.

OCT 31 2008

Subject: Label Notification(s) for Pesticide Registration Notice 2007-4 and 98-10

Change inert ingredients to other ingredients
Added phone number for consumer questions

Dear Ms. Jenkins:

The Agency is in receipt of your Application(s) for Pesticide Notification(s) under Pesticide Registration Notice (PRN) 2007-4 and 98-10 dated September 25, 2008 for:

EPA Registration 3282-81

d-CON Ready Mixed Baitbits

The Registration Division (RD) has conducted a review of this request for applicability under PRN 2007-4 and 98-10 and finds that the label change(s) requested falls within the scope of PRN-2007-4 and 98-10. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact me directly at 703-305-6249 or Nicole Williams of my staff at 703-308-8893.

Sincerely,

Linda Arrington

- EPA Reg. No.: 3282-81
- OPP ID No.: 303691
- Label Change to meet PR Notice 97-6 and 2007-4

Dear Ms. Arrington,

Reckitt Benckiser is notifying the Agency of a few label changes made to the above mentioned registration. These changes should be allowed via Notification. All changes to the proposed Master label are indicted in red text. Below is a summary of these changes:

- Revising the Disposal Instruction as per PR Notice 2007-1. The revised language is taken directly from this PR Notice.
- Changing "Inert" Ingredients to "Other" ingredients as allowed by PR Notice 97-6
- Adding a phone number for consumers to call for questions.

The enclosed documents support this registration action:

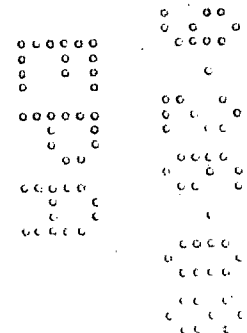

- EPA Application of Pesticide Registration, Form 8570-1, OPP ID No. 303691
- Certification Statement as per PR Notice 95-2
- One copy of proposed label with changes highlighted in red text

Thank you for your assistance with this registration action. If you have any questions, please contact me at (973) 404-2781 or via e-mail at liane.jenkins@reckittbenckiser.com.

d-CON READY MIXED GENERATION II

KILLS RATS AND MICE

Kills Warfarin-Resistant House Mice and Warfarin-Resistant Norway Rats

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets, or other non target animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by children under six years of age and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS: This product may be used to control House Mice, Norway Rats, and Roof Rats in and around homes, industrial, commercial, agricultural and public buildings. d-CON Ready Mixed Generation II may also be used in transport vehicles (ships, trains, aircraft) and in and around related ports or terminal buildings. Do not use in sewers. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or signs of rodents have been seen. Remove as much alternative food as possible. Use tamper-resistant bait stations wherever necessary (see "IMPORTANT:").

APPLICATION DIRECTIONS:

(FOR 12 OZ. BOX ONLY: The amount of bait contained in the trays in this box is unlikely to be sufficient to kill more than 3 to 12 rats. More than one box may be needed to control larger infestations.

To Control Norway and Roof Rats: Place 1 - 4 bait trays per placement. Space placements at intervals of 15 - 30 feet in infested areas. If trays are not fed for 5 consecutive days, relocate them to other places where rodent activity exists and where placements consistent with the requirements of this label can be made. Maintain an uninterrupted supply of fresh bait for at least 10 days.

To Control House Mice: Open tray and apply 1/4 - 1/2 oz. (1 - 2 level tablespoons) of bait at 8 to 12 foot intervals in infested areas. Larger placements (up to 2 ounces) may be needed at points of extremely high mouse activity. Maintain a supply of fresh bait for at least 15 days.

Check bait locations every 2 days for signs of feeding. Replenish bait if more than 1/2 of the original amount has been removed by rodents. Replace contaminated or spoiled bait immediately if rodent activity is still evident. Collect and dispose of all dead animals and leftover bait properly.

To prevent reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: May be harmful or fatal if swallowed. Keep away from humans, domestic animals, and pets. Wash hands after handling bait. IF BAIT IS EATEN BY HUMANS, CALL A PHYSICIAN AT ONCE. For 24 hour emergency assistance, call your local Poison Control Center. IF BAIT IS EATEN BY ANIMALS OR PETS: Call your local veterinarian.

NOTE TO PHYSICIAN AND VETERINARIAN: This product may reduce the clotting ability of the blood and cause hemorrhaging. The anticoagulant action of this product may produce prolonged prothrombin times for 20 to 30 days after exposure. If poisoning occurs, intramuscular and oral administration of Vitamin K₁ are indicated, as in poisoning from overdose of dicumarol (bishydroxy coumarin). **FOR HUMAN CASES:** Vitamin K₁ is antidotal at doses of 10 to 20 mg (not mg/kg).

Repeated treatments may need to be given for up to 30 days (based on monitoring of prothrombin times). In severe cases, blood transfusions may be necessary. **FOR ANIMAL CASES:** Contains Brodifacoum, an anticoagulant with a half-life in the dog of 1 - 4 days. For dogs that have ingested or that are suspected of having ingested Brodifacoum, and/or have obvious poisoning symptoms, such as bleeding or have lowered prothrombin times, give Vitamin K₁ as follows: Vitamin K₁ is antidotal at 5 mg/kg intramuscularly. Oral Vitamin K₁ should be given for up to 30 days at 5 mg/kg (based on monitoring of prothrombin times). In severe cases blood transfusions may be necessary.

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and wildlife. This product can pose a secondary hazard to birds of prey and mammals. Do not apply directly to water.

STORAGE AND DISPOSAL

STORAGE: Store only in original container, in a dry place inaccessible to children and pets.

DISPOSAL: If empty: Non-refillable container. Do not reuse or refill container. Place in trash or offer for recycling if available.

If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

Important: For Direction for use and first aid instruction in Spanish, please call 1-866-648-1819

RE: d-CON Mouse Prufe III
EPA Registration No.: 3282-85
Certification Statement per PR Notice 98-10

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

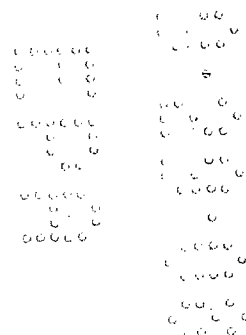

USE RESTRICTIONS:

THIS IS NOT A TAMPER-PROOF OR TAMPER-RESISTANT BAIT STATION. DO NOT USE THIS PRODUCT IN AREAS ACCESSABLE TO CHILDREN, PETS, DOMESTIC ANIMALS, OR NONTARGET WILDLIFE. DO NOT USE THIS PRODUCT OUTDOORS.

This product may only be used to control house mice in homes, industrial, commercial, agricultural and public buildings. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

SELECTION OF TREATMENT AREAS: Wedges of d-CON® Mouse Prufe III may be placed along walls, in corners, and in concealed places where mice are active and where children under six years-of-age, nontarget mammals, and birds will not be exposed to the bait.

APPLICATION DIRECTIONS: Place wedge in horizontal position. Pull tab, lift and twist off. Space wedges at intervals of 8 to 12 feet if mouse activity is not highly localized and placements can be made in areas not accessible to children and nontarget animals. Replace wedges as their contents are consumed. Wedges not touched after 3 days should be moved to new locations appropriate for bait placements (see **USE RESTRICTIONS:**) if mouse activity persists. Maintain a supply of fresh bait for at least 15 days. Collect and dispose of all dead animals and leftover bait properly.

1.5 oz sizes – Back Label

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: May be harmful if swallowed. Keep away from humans, domestic animals, and pets. Wash hands after handling bait. Wear gloves if bait or dead animal may be handled.

FIRST AID.	
Have this label with you when obtaining treatment advice. HOT LINE NUMBER: 1-800-228-4722	
IF SWALLOWED	<ul style="list-style-type: none">• Call a Poison Control Center or doctor immediately for treatment advice.• Have person sip a glass of water if able to swallow. Do not induce vomiting until told to do so by a Poison Control Center or doctor.• Do not give anything by mouth to an unconscious person.
NOTE TO PHYSICIAN AND VETERINARIAN	
Contains Difethialone, an anticoagulant. For humans or dogs that have ingested this product or have obvious poisoning symptoms (bleeding) or elevated prothrombin times, give Vitamin K1 by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal.	

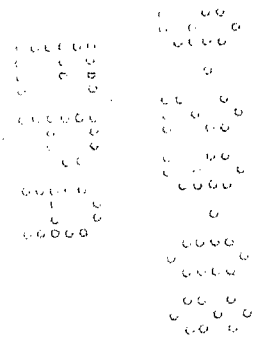

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and wildlife. Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water.

STORAGE AND DISPOSAL

STORAGE: Store in original container in a dry place inaccessible to children and pets.

DISPOSAL: If empty: Non-refillable container. Do not reuse or refill container. Place in trash or offer for recycling if available.

If partly filled: Call your local solid waste agency for disposal instructions. Never place unused products down any indoor or outdoor drains.

Subject: Label Notification(s) for Pesticide Registration Notice 2007-4 and 98-10

Change inert ingredients to other ingredients
Added company phone number and website
Added marketing claims based on net contents
Added phone number for Spanish instructions
Added establishment number(s)

Dear Ms. Jenkins:

The Agency is in receipt of your Application(s) for Pesticide Notification(s) under Pesticide Registration Notice (PRN) 2007-4 and 98-10 dated September 26, 2008 for:

EPA Registration 3282-86

d-CON Bait Pellets III

The Registration Division (RD) has conducted a review of this request for applicability under PRN 2007-4 and 98-10 and finds that the label change(s) requested falls within the scope of PRN-2007-4 and 98-10. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact me directly at 703-305-6249 or Nicole Williams of my staff at 703-308-8893.

Sincerely,

Linda Arrington

- EPA Reg. No.: 3282-86
- OPP ID No.: 303693
- PR Notice 97-6 and 2007-4 and other minor labeling changes

Dear Ms. Arrington,

Reckitt Benckiser is notifying the Agency of a few label changes made to the above mentioned registration. These changes should be allowed via Notification. All changes to the proposed Master label are indicated in red text. Below is a summary of these changes:

- Revising the Disposal Instruction as per PR Notice 2007-1. The revised language is taken directly from this PR Notice.
- Changing "Inert" Ingredients to "Other" ingredients as allowed by PR Notice 97-6
- Company Contact information (phone number and website)
- Marketing claims based on net contents - (4) Bait Trays
- Adding a phone number for Spanish Instructions. The statement will be in Spanish. The English translation is as follows: Important: For directions for use and first aid instructions in Spanish, please call 1-866-648-1819."
- Adding an establishment number

The enclosed documents support this registration action:

- EPA Application of Pesticide Registration, Form 8570-1, OPP ID No. 303693
- Certification Statement as per PR Notice 95-2
- One copy of proposed label with changes highlighted in red text

Thank you for your assistance with this registration action. If you have any questions, please contact me at (973) 404-2781 or via e-mail at liane.jenkins@reckittbenckiser.com.

KILLS MICE AND RATS

Kills Warfarin-Resistant House Mice.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets, or other nontarget animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by children under six years of age and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooved livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS:

This product may only be used to control Norway Rats, Roof Rats and house mice only in the sites identified below.

- In **URBAN AREAS**, this product may only be used in and around homes; in and around industrial, commercial and public buildings; and in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. All applications "around" buildings must be made in tamper-resistant bait stations placed along the walls or other external parts of buildings (e.g. doorways, ramps, loading docks) where rats or mice might seek to gain entrance. Do not use in sewers.
- In **NON-URBAN AREAS**, this product may only be used inside of homes and agricultural buildings.

Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

7
10

12 OZ BOX-BACK LABEL

SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or signs of rodents have been seen. Remove as much alternative food as possible. Use tamper-resistant bait stations wherever necessary (see "IMPORTANT:").

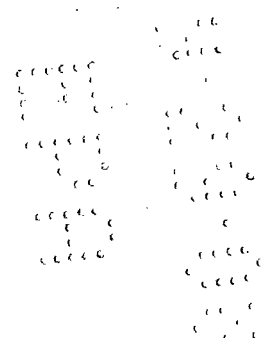

APPLICATION DIRECTIONS:

The amount of bait contained in the trays in this box is unlikely to be sufficient to kill more than 3 to 12 rats. More than one box may be needed to control larger infestations.

To Control Norway and Roof Rats: Use 1 - 4 opened trays per placement. Space placements at intervals of 15 - 30 feet in infested areas. If trays are not fed from for 5 consecutive days, relocate them to other places where rat activity exists and where placements consistent with the requirements of this label can be made. Maintain an uninterrupted supply of fresh bait for at least 10 days.

To Control House Mice: Open tray and apply 1/4 - 1/2 oz. (1 - 2 level tablespoons) of bait at 8 to 12 foot intervals in infested areas. Larger placements (up to 2 ounces) may be needed at points of extremely high mouse activity. Maintain a supply of fresh bait for at least 15 days.

Check bait locations every 2 days for signs of feeding. Replenish bait if more than 1/2 of the original amount has been removed by rodents. Replace contaminated or spoiled bait immediately if rodent activity is still evident. Collect and dispose of all dead animals and leftover bait properly. To prevent reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

12 OZ BOX-BACK LABEL

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: May be harmful if swallowed. Keep away from humans, domestic animals, and pets. Wash hands after handling bait. Wear gloves if bait or dead animal may be handled.

FIRST AID	
Have this label with you when obtaining treatment advice. HOT LINE NUMBER: 1-800-228-4722	
IF SWALLOWED	<ul style="list-style-type: none">• Call a Poison Control Center or doctor immediately for treatment advice.• Have person sip a glass of water if able to swallow. Do not induce vomiting until told to do so by a Poison Control Center or doctor.• Do not give anything by mouth to an unconscious person.
NOTE TO PHYSICIAN AND VETERINARIAN	
Contains Difethialone, an anticoagulant. For humans or dogs that have ingested this product or have obvious poisoning symptoms (bleeding) or elevated prothrombin times, give Vitamin K1 by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal.	

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and wildlife. Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water.

STORAGE AND DISPOSAL

STORAGE: Store in original container in a dry place inaccessible to children and pets.

DISPOSAL: If empty: Non-refillable container. Do not reuse or refill container. Place in trash or offer for recycling if available.

If partly filled: Call your local solid waste agency for disposal instructions. Never place unused products down any indoor or outdoor drains.

NOTICE TO BUYER AND USER: Buyer and User assume all responsibility for safety and risk associated with any use not in accordance with directions. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER'S SOLE LIABILITY AND BUYER'S AND USER'S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.

Subject: Label Notification(s) for Pesticide Registration Notice 2007-4 and 98-10

Change inert ingredients to other ingredients
Added company phone number and website
Added marketing claims based on net contents
Added phone number for Spanish instructions
Added establishment number(s)

Dear Ms. Jenkins:

The Agency is in receipt of your Application(s) for Pesticide Notification(s) under Pesticide Registration Notice (PRN) 2007-4 and 98-10 dated September 26, 2008 for:

EPA Registration 3282-87

d-CON Ready Mixed Baitbits III

The Registration Division (RD) has conducted a review of this request for applicability under PRN 2007-4 and 98-10 and finds that the label change(s) requested falls within the scope of PRN-2007-4 and 98-10. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact me directly at 703-305-6249 or Nicole Williams of my staff at 703-308-8893.

Sincerely,

Linda Arrington

Attention: Linda Arrington

Ref.: **d-CON® Ready Mixed Baitbits III**

- EPA Reg. No.: 3282-87
- OPP ID No.: 303694
- PR Notice 97-6 and 2007-4 and other minor labeling changes

Dear Ms. Arrington,

Reckitt Benckiser is notifying the Agency of a few label changes made to the above mentioned registration. These changes should be allowed via Notification. All changes to the proposed Master label are indicted in red text. Below is a summary of these changes:

- Revising the Disposal Instruction as per PR Notice 2007-1. The revised language is taken directly from this PR Notice.
- Changing "Inert" Ingredients to "Other" ingredients as allowed by PR Notice 97-6
- Company Contact information (phone number and website)
- Marketing claims based on net contents - (4) Bait Trays
- Adding a phone number for Spanish Instructions. The statement will be in Spanish. The English translation is as follows: Important: For directions for use and first aid instructions in Spanish, please call 1-866-648-1819."
- Adding an establishment number

The enclosed documents support this registration action:

- EPA Application of Pesticide Registration, Form 8570-1, OPP ID No. 303694
- Certification Statement as per PR Notice 95-2
- One copy of proposed label with changes highlighted in red text

Thank you for your assistance with this registration action. If you have any questions, please contact me at (973) 404-2781 or via e-mail at liane.jenkins@reckittbenckiser.com.

Sincerely,

Liane Jenkins

KILLS MICE AND RATS

Kills Warfarin-Resistant House Mice

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets, or other nontarget animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by children under six years of age and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS:

This product may only be used to control Norway Rats, Roof Rats and house mice only in the sites identified below.

- In **URBAN AREAS**, this product may only be used in and around homes; in and around industrial, commercial and public buildings; and in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. All applications "around" buildings must be made in tamper-resistant bait stations placed along the walls or other external parts of buildings (e.g. doorways, ramps, loading docks) where rats or mice might seek to gain entrance. Do not use in sewers.
- In **NON-URBAN AREAS**, this product may only be used inside of homes and agricultural buildings.

Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or signs of rodents have been seen. Remove as much alternative food as possible. Use tamper-resistant bait stations wherever necessary (see "**IMPORTANT:**").

7/10

12 OZ. OUTER BOX-BACK LABEL

APPLICATION DIRECTIONS: (Statement to appear on 12oz-4 tray box ONLY:

The amount of bait contained in the trays in this box is unlikely to be sufficient to kill more than 3 to 12 rats. More than one box may be needed to control larger infestations.)

To Control Norway and Roof Rats: Use 1 - 4 opened bait trays per placement. Space placements at intervals of 15 - 30 feet in infested areas. If trays are not fed from for 5 consecutive days, relocate them to other places where rat activity exists and where placements consistent with the requirements of this label can be made. Maintain an uninterrupted supply of fresh bait for at least 10 days.

To Control House Mice: Open tray and apply 1/4 - 1/2 oz. (1 - 2 level tablespoons) of bait at 8 to 12 foot intervals in infested areas. Larger placements (up to 2 ounces) may be needed at points of extremely high mouse activity. Maintain a supply of fresh bait for at least 15 days.

For Rats and Mice: Check bait locations every 2 days for signs of feeding. Replenish bait if more than 1/2 of the original amount has been removed by rodents. Replace contaminated or spoiled bait immediately if rodent activity is still evident. Collect and dispose of all dead animals and leftover bait properly. To prevent reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: May be harmful if swallowed. Keep away from humans, domestic animals, and pets. Wash hands after handling bait. Wear gloves if bait or dead animal may be handled.

FIRST AID	
Have this label with you when obtaining treatment advice. HOT LINE NUMBER: 1-800-228-4722	
IF SWALLOWED	<ul style="list-style-type: none"> • Call a Poison Control Center or doctor immediately for treatment advice. • Have person sip a glass of water if able to swallow. Do not induce vomiting until told to do so by a Poison Control Center or doctor. • Do not give anything by mouth to an unconscious person.
NOTE TO PHYSICIAN AND VETERINARIAN	
Contains Difethialone, an anticoagulant. For humans or dogs that have ingested this product or have obvious poisoning symptoms (bleeding) or elevated prothrombin times, give Vitamin K ₁ by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal.	

12 OZ. OUTER BOX-BACK LABEL

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and wildlife. Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water.

STORAGE AND DISPOSAL

STORAGE: Store in original container in a dry place inaccessible to children and pets.

DISPOSAL: If empty: Non-refillable container. Do not reuse or refill container. Place in trash or offer for recycling if available.

If partly filled: Call your local solid waste agency for disposal instructions. Never place unused products down any indoor or outdoor drains.

NOTICE TO BUYER AND USER: Buyer and User assume all responsibility for safety and risk associated with any use not in accordance with directions. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER'S SOLE LIABILITY AND BUYER'S AND USER'S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.

Subject: Label Notification(s) for Pesticide Registration Notice 2007-4 and 98-10

Change inert ingredients to other ingredients
Added company phone number and website
Added marketing claims based on net contents
Added phone number for Spanish instructions
Added establishment number(s)

Dear Ms. Jenkins:

The Agency is in receipt of your Application(s) for Pesticide Notification(s) under Pesticide Registration Notice (PRN) 2007-4 and 98-10 dated September 26, 2008 for:

EPA Registration 3282-88

d-CON Bait Packs III

The Registration Division (RD) has conducted a review of this request for applicability under PRN 2007-4 and 98-10 and finds that the label change(s) requested falls within the scope of PRN-2007-4 and 98-10. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

1.0 oz. Bait Pack - BACK Panel

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets, or other nontarget animals to rodenticides. To help prevent accidents:

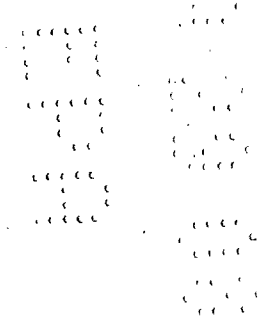

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by children under six years of age and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooved livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS:

This product may only be used to control house mice only in the sites identified below.

- In **URBAN AREAS**, this product may only be used in and around homes; in and around industrial, commercial and public buildings; and in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. All applications "around" buildings must be made in tamper-resistant bait stations placed along the walls or other external parts of buildings (e.g. doorways, ramps, loading docks) where mice might seek to gain entrance. Do not use in sewers.
- In **NON-URBAN AREAS**, this product may only be used inside of homes and agricultural buildings.

Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

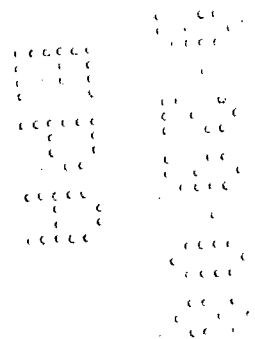

7/20

1.0 oz. Bait Pack – Back Panel (Mice only)

SELECTION OF TREATMENT AREAS: Determine areas where mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or signs of rodents have been seen. Remove as much alternative food as possible. Use tamper-resistant bait stations wherever necessary (see "**IMPORTANT:**").

APPLICATION DIRECTIONS:

To Control House Mice: Use one bait per placement. Space placements at intervals of 8 to 12 feet. 2 bait packs may be used at points of extremely high mouse activity. Maintain a supply of fresh bait for at least 15 days. Check bait locations every 2 days for signs of feeding. Replenish bait if more than 1/2 of the original amount has been removed by rodents. If bait packs are not fed from for 5 consecutive days, relocate them to other places where rodent activity exists and where placements consistent with the requirements of this label can be made. Collect and dispose of all dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, establish permanent bait stations and replenish as needed.

8/20

1.0 oz. Bait Pack – Back Panel (Mice only)

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: May be harmful if swallowed. Keep away from humans, domestic animals, and pets. Wash hands after handling bait. Wear gloves if bait or dead animals may be handled.

FIRST AID

Have this label with you when obtaining treatment advice.

IF SWALLOWED

- Call a Poison Control Center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow. Do not induce vomiting until told to do so by a Poison Control Center or doctor.
- Do not give anything by mouth to an unconscious person.

NOTE TO PHYSICIAN AND VETERINARIAN

Contains Difethialone, an anticoagulant. For humans or dogs that have ingested this product or have obvious poisoning symptoms (bleeding) or elevated prothrombin times, give Vitamin K1 by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal.

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and wildlife. Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water.

STORAGE AND DISPOSAL

STORAGE: Store in original container in a dry place inaccessible to children and pets.

DISPOSAL: If empty: Non-refillable container. Do not reuse or refill container.

If partly filled: Call your local solid waste agency for disposal instructions. Never place unused products down any indoor or outdoor drains.

NOTICE TO BUYER AND USER: Buyer and User assume all responsibility for safety and risk associated with any use not in accordance with directions. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER'S SOLE LIABILITY AND BUYER'S AND USER'S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.

1.0 oz. Bait Pack - BACK LABEL (Rats & Mice)

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets, or other nontarget animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by children under six years of age and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS:

This product may be used to control Norway Rats, Roof Rats and house mice only in the sites identified below.

- In **URBAN AREAS**, this product may only be used in and around homes; in and around industrial, commercial and public buildings; and in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. All applications "around" buildings must be made in tamper-resistant bait stations placed along the walls or other external parts of buildings (e.g. doorways, ramps, loading docks) where rats or mice might seek to gain entrance. Do not use in sewers.
- In **NON-URBAN AREAS**, this product may only be used inside of homes and agricultural buildings.

Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

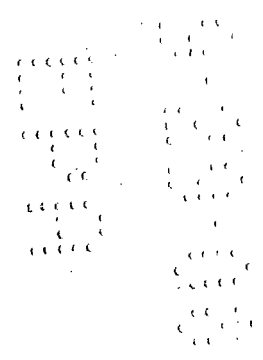

1.0 oz. Bait Pack - BACK LABEL (Rats & Mice)

SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or signs of rodents have been seen. Remove as much alternative food as possible. Use tamper-resistant bait stations wherever necessary (see "IMPORTANT:").

To Control Norway and Roof Rats: Use 4-16 bait packs per placement. Space placements at intervals of 15-30 feet in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days.

To Control House Mice: Use one bait pack per placement. Space placements at intervals of 8 to 12 feet. 2 bait packs may be used at points of extremely high mouse activity. Maintain a supply of fresh bait for at least 15 days.

FOR RATS and MICE: Check bait locations every 2 days for signs of feeding. Replenish bait if more than 1/2 of the original amount has been removed by rodents. If bait packs are not fed from for 5 consecutive days, relocate them to other places where rodent activity exists and where placements consistent with the requirements of this label can be made. Collect and dispose of all dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, establish permanent bait stations and replenish as needed.

1.0 oz. Bait Pack - BACK LABEL (Rats & Mice)

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: May be harmful if swallowed. Keep away from humans, domestic animals, and pets. Wash hands after handling bait. Wear gloves if bait or dead animal may be handled.

FIRST AID

Have this label with you when obtaining treatment advice.

IF SWALLOWED

- Call a Poison Control Center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow. Do not induce vomiting until told to do so by a Poison Control Center or doctor.
- Do not give anything by mouth to an unconscious person.

NOTE TO PHYSICIAN AND VETERINARIAN

Contains Difethialone, an anticoagulant. For humans or dogs that have ingested this product or have obvious poisoning symptoms (bleeding) or elevated prothrombin times, give Vitamin K1 by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal.

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and wildlife. Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water.

STORAGE AND DISPOSAL

STORAGE: Store in original container in a dry place inaccessible to children and pets.

DISPOSAL: If empty: Non-refillable container. Do not reuse or refill container.

If partly filled: Call your local solid waste agency for disposal instructions. Never place unused products down any indoor or outdoor drains.

NOTICE TO BUYER AND USER: Buyer and User assume all responsibility for safety and risk associated with any use not in accordance with directions. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, SELLER SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT AND SELLER'S SOLE LIABILITY AND BUYER'S AND USER'S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.

Important: For Direction for use and first aid instruction in Spanish, please call 1-866-648-1819
